REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: None of the prior art of record teach or suggest an apparatus having a compression module, a transfer device and a thermal cycle molding module (injection molding module) for forming a dosage form. The closest prior art (GB reference 759,081) teaches two compression-molding modules and a transfer device, but fails to disclose or suggest that the second of the two molding modules is an injection-molding module. Sowada (2002/0028240) discloses a timed release compression coated solid composition wherein injection molding of a coating is suggested, but the reference fails to disclose or suggest the structure for performing such a step. Upon reconsideration the mentioning of injection molding by Sowada is interpreted as an area of further consideration. It is clear from applicant's response that substantial work would be needed to develop the mentioning of injection molding by Sowada into a viable apparatus for performing the encapsulation of a compression molded dosage form by injection molding.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
